Real Colorado EDGE Soccer Club welcomes our new Athletic Trainer Kasey Currence

Please welcome our new Athletic Trainer from Children's Hospital, Kasey Currence! We hope you share in our great excitement for our partnership with Children's Hospital and the value that it will have for the club and our athletes by providing immediate evaluation of any injuries. Kasey will be a part of the club and looks forward to developing relationships with our coaches, players and parents that are important for the well-being of the athlete and make care more accessible.

Kasey will be working throughout the year during our Saturday home games at Stenger Soccer Complex, at our hosted tournaments and will be available in our club office on Mondays for in-person visits. Kasey's primary responsibility when working with our athletes will be injury evaluations, prescription of home exercise programs, referrals to physicians, follow ups, minor rehab, and consultations as needed. This service is a benefit of being a member of our club, free of charge to our boys and girls, recreational and competitive athletes, ages 9 and older.

In the coming weeks, we will be sending out instructions on how to download the **Healthy Roster app** that will be a direct line of communication with Kasey and Children's Hospital so you can notify Kasey of your injury or concern and coordinate to meet her for an evaluation. The app is completely secure and will allow parents and coaches to report injuries through the app directly to Kasey so that she can follow up with the athlete/parents quickly. Until the app becomes available, please feel free to email David Kramer, davidk@edgesoccer.net with your name and concern and he will connect you with Kasey.

Thank You
Real Colorado EDGE Staff
